PROFESSIONAL SUMMARY

Strategic **Systems Engineer and Data Architect** with over 1.5 years of experience in the digital transformation of manufacturing environments. Expert in engineering high-velocity ETL pipelines processing **exceeding 140,000 daily transaction records**. Specialized in Warehouse Management Systems (WMS), **Android-based** industrial tools, and real-time Business Intelligence (BI) dashboards. Adept at converting raw industrial data into actionable executive insights using PHP, SQL, and Python.

TECHNICAL SKILLS

Data Engineering & BI: SQL (MySQL, MS SQL Server), Data Modeling, ETL Pipelines, Database Indexing, Dashboarding, Tableau, Microsoft Access

Full Stack & Mobile: PHP (Core/MVC), Python (Pandas/NumPy), React.js, Node.js, Android Development, RESTful APIs, JSON, HTML5, CSS3

Systems & Architecture: WMS Architecture, ERP Logic Design, QR/Barcode Infrastructure (CODESOFT), RBAC Security, Industrial Automation

Methodology & Tools: Git, GitHub, CI/CD, XAMPP, WAMP, System Design, Linux CLI, Agile, RDBMS, Data Structures, UAT

PROFESSIONAL EXPERIENCE

Pacific Cyber Technology Pvt. Ltd.

June 2024 – Present

Senior Officer – Software Development & MIS

Gujarat, India

- **Data Pipeline Orchestration:** Synthesized high-volume production logs exceeding **140,000 daily records**. Integrated SQL Server (COSEC) with internal systems to launch a **Workforce Analytics Dashboard**, optimizing labor utilization by 15%.
- **WMS Infrastructure Engineering:** Spearheaded the architecture of an enterprise-level Warehouse Management System tracking **more than 10,000 SKUs**. Optimized indexing for 2D/3D scanning integration, resulting in a **35% improvement** in stock-retrieval latency.
- **Strategic Production Planning:** Conceptualized and deployed a modular IPP tool for **Procurement** and Engineering. Engineered a backend **Timeline Validation Engine** that eliminated 100% of scheduling conflicts between ETA and ETD.
- **Logistics Automation:** Optimized a **Full-Stack** logistics portal for Finished Goods (FG). Automated e-invoice logging and digitized checklist generation, successfully reducing vehicle turnaround time (TAT) by **20 minutes per dispatch**.
- **Predictive Analytics:** Developed an automated "End-of-Life" (EOL) priority engine using Python to prevent inventory write-offs through aging and cost-priority ranking.

TECHNICAL PROJECTS

Financial Business Intelligence Tool | React, PHP, SQL

- **Executed** a departmental financial tracking platform with a centralized executive dashboard. Applied complex data aggregation to provide real-time budget insights, cutting manual reporting effort by **40%**.

Enterprise Asset Management (AMS) | Full Stack, RBAC

- **Architected** a lifecycle tracking system for more than 1,000 IT assets. **Enforced** automated warranty notifications and digitized 1,200+ procurement records for searchable access.

ERP/BOM Synchronization Utility | Python, ERP Integration

- **Orchestrated** a "BOM-Fetch" engine to synchronize material requests with K3 ERP systems. Reduced manual data entry by **50%** and eliminated material kitting errors between warehouse and production modules.

Station Skills Management Infrastructure | C#, CODESOFT

- **Applied** global QR data structures for over 1,000 personnel. Built a high-speed printing utility ensuring 100% scanning readability across all manufacturing, attendance, and shift-management modules.

EDUCATION

Parul University

2020 – 2024

Bachelor of Technology (B.Tech) in Computer Science

Vadodara, Gujarat

- **Result:** Graduated with a **7.27 CGPA** (First Class Distinction).
- **Core Coursework:** RDBMS, Data Warehousing, Algorithms, Operating Systems, and System Design.

PROFESSIONAL COMPETENCIES

Strategic Documentation: Authored 12+ SOPs for technical workflows including QR-based tracking and Material Receipt Note (MRN) data integrity.

Languages: English (Professional), Hindi (Native), Gujarati (Native)
